PRICE THREE CENTS

LODGED IN JAIL

Cuban Sympathizers Arrested
at Penn's Grove, N. J.

NORVIOLATING NEUTRALITY LAW!

United States Deputy Marshal Lannan
Seizes Seven Upon Them—Will Pro-
vide With Arms, Ammunition, Pre-
visions, Etc.—Prisoners Not Allowed to
Leave to Make a Statement.

WILMINGTON, Del., Aug. 30.—Twenty
men were brought here today from
Penn's Grove, N. J., and lodged in jail,
charged with violating the neutrality
laws in having organized a human ex-
pedition to Cuba. They are still here,
in custody of the United States authori-
ties, and will be arraigned on Monday.

It had been suspected for several
months that a Cuban filibustering party
was at work in this city. It was
learned that they have headquarters at
Penn's Grove, where, and that at least
one, if not more, expeditions to Cuba
have been dispatched from this city.

On Monday the United States authori-
ties were notified by Detective
Gaylord of the Pinkerton agency in
Philadelphia that another expedition
was about to take its departure. De-
tective Gaylord and several associates
came the next day. United States De-
puty Marshal Lannan and several assis-
tants, together with the police autho-
rities, have been keeping a close watch
ever since. They noticed a number of
peculiar characters, who about the
cigar stores and neighborhood of the
headquarters of the Junta, and discov-
ered that one of these had gone to the
office of the Charles Warner company
Thursday and chartered the tug Taurus
to carry freight to Penn's Grove. They
followed the tug until she left the
wharf in this city at midnight Thursday
day next.

It was known beforehand by the au-
thorities that the alleged filibustering
party was to wait at Penn's Grove for a
steamer from Philadelphia to take them
to Cuba. The American Tobacco com-
pany, however, had received word that
she was not expected to arrive at Penn's
Grove until midnight Thursday. The
pursuing party therefore permitted the
men they were watching to load their
freight and embark the tug at the
headquarters of the Junta, and discov-
ered that one of these had gone to the
office of the Charles Warner company
Thursday and chartered the tug Taurus
to carry freight to Penn's Grove. They
followed the tug until she left the
wharf in this city at midnight Thursday
day next.

There is little question that the Amer-
ican Tobacco company will resist these
proceedings to the very last, and the trust
will be compelled to make a combination
of all the cigarette manufacturers of
the country. It is held that the
American Tobacco company will
make a stand, and the other companies
will be compelled to follow suit.

city has been under Republicans domination for years and there is no ordinance that would prevent a man from building a two-story building on north Main street if he desired to do so.

"Campbell is a nice man," says Governor McKinley, "but General Rutherford will defeat him at the polls." The value of this prognostication is discounted by the fact that the Governor's reputation as a political prophet, like his reputation as a political economist, is yet to be made. He will scarcely make it by shutting his eyes to the fact that Ohio is at all times a close State, and that Prosperity and Sound Money are engaged in an active campaign for the Democracy this year.—*Plain Record.*

The Bellefontaine Examiner says: "The recklessness and 'rascally' increase of local taxation inflicted upon the people by the last two Republican legislatures—their wholesale increase of the public indebtedness, and the robbery raid of the last of these hoodlums, by which \$90,000 of the people's money was appropriated by its members, without any return of service—facts which should not be allowed to go unrebuked at the polls, and we hope will not be."

The gross neglect of his official duties by Governor McKinley, whose moral sense seems to have suffered by his almost insane ambition to be President, has been observed by all. The notorious mismanagement of the State institutions under his negligent administration, should also be an important consideration with the honest voters of Ohio. In no State is the demand for reform more imperatively made than it is upon good citizens of this—our own.

The Horse Will Not Go.

Half a century ago, when the era of railway building began in America, it was predicted that the day of the horse was over. The day of the stagecoach certainly was over, and the age of slow travel, but there are too times as many horses in the country today as there were 50 years ago.

It will be just the same when the bicycle and the electric railway and even the horseless wagon do their perfect work. The horses of America in past years have generally been inferior to those of Europe. We have had tremendous trotters and pacers, and Kentucky and Virginia gaited saddle horses unequalled in beauty, grace and intelligence in the world over. We have even had a few thoroughbreds that compared favorably with those of Great Britain. We also developed the pacing horse as a track animal. But the fact remains that up to this time the common horse of America has been fearfully scrub. He was small; he was muddy looking; he had little strength and hardly so much intelligence as his European cousins, bred for centuries from the best equine blood on the planet.

Once more this country has had its awful annual lesson on the subject of forest fires. The terrible ravages of the flames in Washington state will result in the loss of many millions of dollars and a loss of life that probably can never be exactly known. Few incidents in the history of the northwest are so tragic as that of the four carpenters who jumped to their death down a chasm 136 feet deep while trying to extinguish the flames upon a burning bridge. These fires usually begin in one way—through the criminal negligence of hunters and campers. Occasionally a spark from a railway engine wakes the fire fiend, but generally it is the reckless, wicked hunters who do it. The only way to stop the annual destruction seems to be for states themselves to enact forest laws with inspectors who are constantly on guard during the warm weather. Five minutes in the beginning would have extinguished the flames that have wrought such ruin in Washington.

England and the United States will not stop out here in America. Already thousands of specimens of the tribe have been reduced to horse beef in the northwest and shipped to France or sold on the Chicago market. But the fast trots, the really fast one, brings more money than he ever did. So does the very handsome, large, high stepping carriage horse. Mankind loves a fine horse and always will do so. A Boston dealer says that the trade in horses has doubled itself in the past three years in that city in spite of hard times. Another dealer says he has sold more ponies, Shetlands and others, with carriages to match, in the past six months than he has done in ten years.

It is absolutely certain that the gaunt, perfectly trained saddle horse, the handsome high stepping carriage horse, the lightning trotter and pacer will not go at all. Neither will the heavy draft, at least not for many years to come. Farmers ought to remember meanwhile that it takes five years to get a colt ready to put upon the market as a thoroughly educated horse.

The government estimates of the wheat harvest for the year, just issued, prove this country to be the granary of the world with untold golden wealth in bins and elevators to the credit of the farmers. The returns for the United States indicate 400,017,000 bushels of wheat in sight. Our great competitor in the South American Republic of Argentina has but 60,995,000. Russia is up to the 410,456,000 and India stops at 237,456,000, but these figures, great as they are, do not represent the need of the world, as they are only ordinary beyond home consumption. As a consequence the European centers must seek their supplies in this country and that means the turning point in gold shipments abroad. It will very soon be coming this way as never before.

As a consequence the European centers must seek their supplies in this country and that means the turning point in gold shipments abroad. It will very soon be coming this way as never before.

The Lima Gazette's editor is terribly agitated because two-story frame buildings are being built on north Main street, and charges the Republican members of the council with complicity in an organized scheme to remove away from council meetings, thus preventing a quorum for the transaction of business until the buildings in question have been finished. While it is not all beyond the legislation of those concerned so as just that sort of thing if there would be anything in it for them, it was quite needless for them to do so, for the property on north Main street where the buildings in question are being built is not within the boundaries of the fire lines. This

proper nourishment. Feed the nerves, organs and tissues on rich red blood, and how soon the glow of health comes to the pale skins, firmness to the wavy hair, and strength to the faltering limb.

Hood's Sarsaparilla

purifies, vivifies and quickens the blood and is the best friend to unfortunate humanity. Do you care to get Hood's and only Hood's. Advertising, get it now.

Waller.

If the fact that John L. Waller is a negro had anything to do with this government's delay in seeing him righted, then this government disgraced itself. But in any case vigorous measures seem now about to be taken by the authorities at Washington, so that all may yet be well. John L. Waller was a colored man of Kansas City. He was born a slave at New Madrid, Mo., in 1850. He struggled on after the war till he graduated at a high school. He was a live, brainy man and became a lawyer. He was a journalist for President Harrison, in 1891, appointed his counselor at Tamatave, Madagascar. Waller liked the Hova, and they liked him. They became great friends, and when, in 1894, President Cleveland appointed Mr. Waller of Georgia consul in Waller's place Waller remained among his new friends and entered into trade with them.

It was his intention to go heavily into the farming and lumber business. With American shrewdness he saw a chance for great fortune in the rich soil and virgin forest of Madagascar. The Hova made him to him on conditions of certain payments a lease for 30 years of a tract containing 144,000 square miles of land. It lay along the east coast of the big island and contained many harbors. If Waller had been let alone by the French, he would have become as rich as Monte Cristo. It was his intention to ship the wood, fruits and other products of Madagascar to Europe and America. The execution of the enterprise would have been an excellent thing for both Waller and the Malagasy government.

Then came the French invasion of Madagascar. The French determined that Waller should not have the rich concession granted to him by the Malagasy government because they wanted it themselves. So they trumped up a charge that Waller was inciting the Hova to outrage, murder and riot. He was arrested. A form of military trial was secretly gone through. Not a friend of Waller was allowed to be present. At the end of the trial, which occurred March 18 and lasted three hours, Waller was sentenced to 20 years' imprisonment in the old French Chateau d'Ile. He was taken to France a prisoner in irons. It is charged that he has suffered harshly and cruelly at the hands of the French. His friends say he has complained. The French government, when asked for explanations, put off Embassies Eustis with the excuse that the official report of the trial had not yet arrived from Tamatave, and there could be no investigation. But now the United States government must insist on a thorough investigation, and that very quickly.

My little boy, when two years of age, was taken very ill with bloody diarrhea. I was advised to use Chamberlain's Colic, Cholera and Diarrhea Remedy, and kindly procured part of it. That was very effective, so that he has not been ill since. The demand for these remedies is still large, and some cancellations for foreign men's cloths are reported because goods do not come up to samples. At the same time the receipts from abroad continue heavy, and the outcome is so far in doubt that manufacturers are not buying beyond their actual needs.

The project for wheat has hardly begun, though the prices through the month of August have advanced to 25¢ a bushel. Between the hours of one o'clock and four o'clock in the afternoon, the price of wheat has fallen 1½ cent. Western receipts have decidedly increased, but are only 33,905,900 bushels against 23,485,850 last year. The demand for wheat is still large, and some cancellations for foreign men's cloths are reported because goods do not come up to samples. At the same time the receipts from abroad continue heavy, and the outcome is so far in doubt that manufacturers are not buying beyond their actual needs.

The original four turned toward him with a look of expectant triumph, ready to yell at the first sign of conclusion.

"He chased them," went on the Irishman, "and they all ran up a tree. Then 'Come down,' said the farmer, but they wouldn't.

"Will ye come down for once?" asked the farmer.

"We will not," answered the boys.

"Will ye come down for twice?"

"We will not."

"Will ye come down for three times?"

"So they all came down."

And with that the big Irishman walked at the only other man in the company who was not of the story telling crowd. The yarn spinners laughed uproariously for a second or two, and then a light went up, as the Germans say, and they stopped suddenly. They looked at one another for a minute, then one said, "Come down," said the farmer, but they wouldn't.

They looked at one another for a minute, then one said, "Come down," said the farmer, but they wouldn't.

"Will ye come down for once?" asked the farmer.

"We will not."

"Will ye come down for twice?"

"We will not."

"Will ye come down for three times?"

"So they all came down."

And with that the big Irishman walked at the only other man in the company who was not of the story telling crowd. The yarn spinners laughed uproariously for a second or two, and then a light went up, as the Germans say, and they stopped suddenly. They looked at one another for a minute, then one said, "Come down," said the farmer, but they wouldn't.

"Will ye come down for once?" asked the farmer.

"We will not."

"Will ye come down for twice?"

"We will not."
